W. HY. SMITH, A. S. CAMP, THOS. CALLENDER. J. P. JONES.

THE undersigned are prepared to introduce into use in Tecnesare W. F. CHILDS & CO.'S PATENT ELAS-TIC VIRE AND WATER-PROOF CEMENT ROOFING, and ask the attention of Architects, Builders, Railroad Comanies, and the public to examine its superiority over other ARCHITECTS AND BUILDERS should not fail to ARCHITECTS AND BUILDERS should not fall to examine this Roofing, as it is better and cheaper than any thing in use. The insterial forms a hard and smooth surface that will resist the action of the atmosphere in every climate. It is importable to water, elastic, and flexible. It contracts and fixpands with the changes of the atmosphere, and will neither evaporate, crack nor rot; and, as to the deal will be there is no greatform. its durability, there is no question.

It is practically imperishable, and will perfectfully resist any ordinary external exposure to fire, as is abundantly proved, and we will warrant it water-proof. We will engage to put our Rooding on over ordinary good heathing, old shingles, tar and grayed, tin, sinc, copper, or iron roofs and the state of the state -it making no difference how steep or flat they may be-for seven dollars per one hundred square feet; it being far cheaper than any Roof of the old style, and we are sure it

will also be found to be the best thing ever invented to It will also be found to be the best thing ever invented to cover or mend old leaky tin, tar and gravelroofs, or around chimneys, scutiles, dormar windows, and gutters, where the tin is rusted through. This Cement can be put on to last as long as stone, and form a perfect adhesion to any object to which it is applied. The Roofs can be painted over (and warranted not to leak) at two dillars and fifty cents per hundred square feet, which is cheaper and much betten than paint. This Roofing will be found to be the best thing for covering large Roofs where they are exposed to fir—such as Steam Mills, Saw Mills, Factories, Railroad Cars, Bridges, Depots Station Wouses, Steamboat Decks, and, in fact every kind of Roof where there is an external exposure from fire. As the Roof is perfect, without a joint in it, it presents ne chance for fire to communicate, and any in it, it presents no chance for fire to communicate, and any light substance will burn out without igniting.

Theurance Offices at Cincinnati, and other places

where Childs & Co.'s Cement has been used, insure Buildings with Boofs covered sith this Cement, at the same rates as for those covered with Iron, Copper or Tin

The Cement will be furnished to those at a distance with directions for using.

OFFICE BUCKEYS STATE INSURANCE COMPANY, CINCINNATI, Dec. 16, 1556 TO ALL WHOM IT MAY CONCERN. This is to certify that have examined specimens and Roofs of W. E. Childs & Co."
Eliastic Fire and Water Proof Cement Roofing." and be Here it to be eminently superior to any other kind of Boof-ing in use. I was an eye witne m of a severe trial of one of these Roofs from a large volume of flame from an acjoining building, which struck directly upon the roof and cornice for nearly half an hour. It stood the trial beyond all ex-pectation, and saved the building. T. M. HASKELL, President Buckeye State Insurance Co.

CINCINSATI AGENCY ROYAL INSURANCE COMPANY, } I have examined W. E. Childs & Co.'s "Elastic Fire and Water Proof Gement Roofing," and as far as I can Judge, consider it a great invention, and am willing to insure buildings time protected upon the same terms as I insure those covered by metal.

Having made considerable inquiry as to the merits of the
*Patent Elastic Cement Roofing," introduced into this city by Childs & Co., I find it to be highly recommended in this ready and general introduction; that its superiority over the tar composition Roofing is decided and freely admitted; and finally, I expect to adopt it for my next root, which will be next summer—having intended to use tin, but will try the virtues of the "Patent Flastic Roofing" as a substitute.

OFFICE OF THE CIN., HAM AND DATTON RAILROAD. Childs & Co.'s Patent Cement Roofing is now used here on our heat class of Buildings. We are covering our Freight Cars with it, and our Master Mechanic reports very favor-able to it.
